INTRODUCTION

B.Tech Computer Science graduate (Nirma University) and Zoho Creator Certified Developer, currently building enterprise low-code applications and government API integrations for a UAE client. Comfortable across the full delivery cycle – requirements gathering with business stakeholders, Deluge development, REST API integration and production support – with an AWS and DevOps background behind it. Seeking a developer or technical consultant role in the UAE.

PROFESSIONAL EXPERIENCE

Zoho Developer Intern

Aarialife Technologies

Apr 2026 – Present Pune, India / Dubai, UAE (Remote)

Delivering Zoho Creator solutions for a UAE higher-education client. Client name withheld under NDA.

Government Data Reporting Integration – UAE Ministry of Higher Education (CHEDS/GSB)

- Built and maintained a Zoho Creator application submitting institutional data to the UAE Ministry of Higher Education's CHEDS/GSB API across 15 reporting modules, covering enrolments, graduates, graduate licensure, research impact, attrition, institutional financials, learning outcomes and startup spinoffs.
- Increased bulk-push throughput from 25 to 110 records per run by optimising lookup functions; isolated the platform's hard execution limit at 126 records and escalated it to Zoho Support with reproducible evidence.
- Wrote Deluge functions for add, update, delete and bulk-push operations against staging and production APIs, with error handling, batch limits and automatic retries for duplicate records.
- Eliminated data defects that sent incorrect or blank values to the Ministry – swapped category/reason codes, broken dropdown mappings, staging IDs leaking into production fields and duplicate-record creation.
- Validated datasets against the Ministry's API rules and HEDB Data Dictionary before upload, and used a staging/production Postman collection to reproduce and document gateway-side errors (GSB_001/002, rejected term codes, email-domain validation) with the Ministry's technical contact.
- Built a Python/Streamlit tool converting Ministry HEDB Excel exports into Zoho Creator import-ready files using per-module mapping configurations.
- Standardised 38 reports to a consistent column layout; authored user guides and delivered client training on record management.
- Ran a feasibility study covering 58 Ministry reporting forms and produced a ranked rollout plan for full system-to-Ministry sync.

EDUCATION

B.Tech in Computer Science & Engineering

Nirma University

2021 – 2025 Ahmedabad, India

HSC

D.B.J College, Chiplun

2021 Maharashtra Board

SSC

Christ Jyoti Convent High School

2019 Maharashtra Board

CERTIFICATIONS

 **Zoho Creator Certified Developer – Associate**
Issued: Apr 2026 | Valid till: Apr 2028
ID: ZCCA3101

 **AWS Certified Solutions Architect – Associate (SAA-C03)**
Issued: Mar 2026 | Valid till: Mar 2029

 **AWS Certified Cloud Practitioner**
Issued: Jan 2026 | Valid till: Jan 2029

 **The Web Developer Bootcamp 2024**
Colt Steele (Udemy)

 **Neural Networks & Deep Learning**
Andrew Ng (Coursera) – Score: 99/100

Student Information System (Zoho Creator) – UAE Higher-Education Client

- Delivered the learning-outcome attainment module end to end: outcome masters, assignment-to-rubric mapping, exam evaluation form, outcome linkage matrix, 3 custom JavaScript widgets and role-based access.
- Built academic-integrity case management and feedback/quality-assurance modules, including automated feedback averaging and dashboards.
- Built a visa expiry scheduler with student and administrator notifications and renewal handling, integrated with Zoho CRM and Zoho Books.
- Delivered a division-merge change request: merge setup with validation, a combined attendance screen, attendance written back to each student's own program, and semester-end closure tracking.
- Gathered requirements directly with client stakeholders (Registrar and Quality Assurance offices) and reported daily and weekly status to management.

DevOps Intern

Cloud Solitaire Technologies

📅 Jan 2025 – June 2025 📍 Ahmedabad, India

- Designed and deployed scalable infrastructure using AWS ECS; automated provisioning with Terraform.
- Developed CI/CD pipelines using GitHub Actions, improving deployment reliability and velocity.
- Configured monitoring and alerting using CloudWatch; contributed to incident response documentation.
- Deployed frontend apps on S3 with CloudFront, HTTPS, and domain setup.
- Setup Kubernetes cluster with Bitbucket CI Runners and autoscaling to simulate on-call environments.

Web Developer Intern

Wings Web Media

📅 May 2024 – June 2024 📍 Surat, India

- Developed a WordPress website for a client to list advertising platforms.
- Worked directly with the client on requirements, content and delivery timelines.

PROJECTS

Financial Data Pair Trading Platform React, Node.js, MongoDB

- Built a responsive web app with real-time visualisations of financial pairs; backend APIs connected to SQL/MongoDB for analytics.

Real-Time Data Pipeline Kafka, Spark, Python, SQL

- Created an ingestion pipeline for high-frequency financial data; applied SQL-based checks for data quality and error handling.

Image Regeneration using U-Net Python, TensorFlow, OpenCV

- Built a deep-learning pipeline reconstructing clear images from blurred datasets, with patch-based preprocessing; achieved strong SSIM and PSNR gains over baseline.
